International Classification of Diseases (ICD)-10 Codes
Tobacco/Nicotine Dependence, and Secondhand Smoke Exposure
Effective October 1, 2015

Background and Context

Through September 30, 2015, the ICD-9 diagnostic code for identifying and documenting patients who use tobacco is 305.1. Thus, there has been a single diagnostic code for tobacco use/dependence.

Effective October 1, 2015, healthcare will transition to ICD-10 codes. ICD-10 expands the breadth and depth healthcare documentation in general and for tobacco use and exposure in particular.

The transition to ICD-10 is required for everyone covered by the Health Insurance Portability Accountability Act (HIPAA). The change to ICD-10 does not affect Current Procedural Terminology (CPT) billing codes for outpatient procedures and physician services.

Purpose of this Document

This document provides the new ICD-10 codes for patients who use, are dependent on, or are exposed to nicotine/tobacco. For example, ICD-10 includes specific codes/modifiers for cigarette use, chewing tobacco use, smoking during pregnancy, exposure to secondhand smoke, and many others.

Importantly, the former ICD-9 code 305.1 (tobacco use and dependence) will transition to the new ICD-10 codes:

- F17.2 (nicotine dependence),
- 099.33 (smoking complicating pregnancy, childbirth, and the puerperium),
- P04.2 (newborn affected by maternal use of tobacco),
- P96.81 (exposure to environmental tobacco smoke in the perinatal period),
- T65.2 (toxic effect of tobacco and nicotine),
- Z57.31 (occupational exposure to environmental tobacco smoke),
- Z71.6 (tobacco use counseling, not elsewhere classified),
- Z72 (tobacco use not otherwise specified (NOS),
- Z77.2 (contact with and exposure to environmental tobacco smoke), and
- Z87.8 (history of nicotine dependence).

Each of these codes are often used with modifier(s) to specifically define the type of tobacco use or exposure. See pages 2 – 4.

The full set of nicotine, smoking, tobacco, and smoke exposure ICD-10 codes are on the pages that follow.

Excludes1

A type 1 Excludes note is a pure excludes. It means 'NOT CODED HERE!' An Excludes1 note indicates that the code excluded should never be used at the same time as the code above the Excludes1 note. An Excludes1 is used when two conditions cannot occur together, such as a congenital form versus an acquired form of the same condition.

Excludes2

A type 2 excludes note represents 'Not included here'. An excludes2 note indicates that the condition excluded is not part of the condition it is excluded from but a patient may have both conditions at the same time. When an Excludes2 note appears under a code it is acceptable to use both the code and the excluded code together.
